

## Tata Motors launches eco-friendly Indica model

Tata Motors Friday launched a new dual fuel, eco-friendly model of its Indica range of vehicles.

The new model, Indica V2 Xeta LPG, is equipped with a dual fuel (petrol and LPG) engine that will reduce carbon dioxide emissions by about 10 percent and has high fuel efficiency both in the city and on highways.

Certified for BS III emission norms, it can be upgraded to comply with Euro-IV norms, the company announced here.

The new model affords a smooth transition between the two fuel modes even when the vehicle is moving. The electronically-controlled gas multi-point fuel injection system provides significant safety, performance and emission related advantages.

The Xeta LPG has been launched in two variants with five colour options. The GLE version is priced at Rs.327,000 (ex-showroom, Delhi) and the higher version, GLS, is at Rs.342,000 (ex-showroom, Delhi).

Tata Motors notched revenues of \$7.2 billion last year. Recently, the company successfully negotiated a deal to take over the coveted Jaguar and Land Rover brands of Ford Motors.
