

## Hexolabs takes edutainment to tiny screens

'Learning math was never this fun before" - Rajamanohar, Director, Research and Development

The right mix of entertainment in education creates wonders. We at Hexolabs strongly believe that if the learning process amuses the kids then it creates a difference and a new learning curve.

We have created mobile applications which indulge the young minds in a thoroughly different experience imparting education with fun. These games and applications have all the fun elements to its sack. This makes the experience enjoyable and imparts knowledge deep in the minds of the young. These games and applications come in different forms, from puzzles to adventures. The educational aspects along with fun make it unique. Finally parents have one good reason to let their kids play games in their mobile phones. These educational games have different stages to suit different age levels. The hardest level can pose a serious challenge to an adult. These aspects of the game make it suitable for everyone on the move.
