

## Syntensia unveils Freedom Special Offer for Indian Market

Syntensia, the pioneer in Security on-demand solutions, today announced their Freedom Special Promotional offer for Small and Medium Businesses and SOHO where at a nominal subscription fee of Rs. 2000 per month, an organization can secure their network from the threats of the internet. Through out the month of August, the 'Freedom Special' Offer allows organizations to avail an annual security subscription at Rs. 24,000 all inclusive. This offer also comes with a 60 days money back guarantee.

'In the spirit of the 60th year of Indian Independence, we have launched this very special offer for our Indian market. With the Freedom Special offer, we aim to make the pricing of the network security very affordable, so that sophisticated technology can be made accessible and affordable to everyone, specially the smaller and emerging companies.' says Miral Nandani, Chief Operating Officer, Syntensia AB.

'With this offer, we are not just providing our customers Freedom from viruses, trojans, spyware, spam, hackers, malware, phishing etc. but also the Freedom of Choice. This solution is available to customers on a subscription rather than them investing in the cost of the solution, giving them the freedom to re-evaluate the quality of our service. Therefore, it ensures our relentless focus on improving customer satisfaction. We see this as a very powerful combination, one that benefits our customers quite uniquely.' Mr. Nandani added.

Syntensia's White Knight appliance is a Plug and Play ready, all-in-one network security solution that integrates crucial security check points like Firewall, VPN, Intrusion Detection and Prevention, Anti Virus, Surf Protection, Spam elimination and Spyware protection and this is available at a nominal subscription fee.

Syntensia's subscription model typically bundles everything into a single subscription fee, including automatic updates, maintenance and 24 X 7 technical support, thus enabling organizations to eliminate upfront costs, provides a predictable cost structure, ensures quality of service, and the freedom to re-evaluate the solution decision any time.
