

Firepro Systems affirms its market leadership in safety and security,

Firepro Systems, the leading safety and security solutions provider of the country, has bagged the **Best Company of the Year** in the Fire System Integration at the Frost and Sullivan Building Technology Excellence Awards, 2007. This award, which is presented to companies that have proved their diligence, perseverance, and dedication required to develop a successful business plan and excel in the increasingly competitive global marketplace, has affirmed Firepro's niche position in the safety and security spectrum.

This award provides further testimonial to Firepro's competence over integrating components from different manufacturers and providing a synchronized, well networked solution that suits the needs and requirements of the customer.

Said Mr. N.S Narendra, Chairman and Managing Director, Firepro Systems, "This recognition further reiterates our expertise in system integration. We don't just integrate components, but provide working systems with backed up by a high level of service and support during the process of installing, commissioning, integration and post integration support."

The Frost and Sullivan Building Technology Summit 2007 event finds credence in the changing attitudes towards preference for state-of-the art building systems, including adoption of world class safety and security features. Moreover, the demand for building systems has surpassed even the most optimistic expectations of many in the industry and is expected to further grow by CAGR of 27 % in the next 5 years.

As already, mentioned, this program covers the entire spectrum of products and services from the industry, such as, Building Management Systems, Energy Management Services, HVAC Controls, System Integration, Fire detection and Alarm, Electronic Access Control, Intrusion Detection, Video Surveillance (CCTV), Perimeter Protection and Security Guarding. It also covers relatively new areas such as Remote Monitoring Services (IP) and Video Analytics.
