

STCThirdEye expands its National Footprint

STCThirdEye Technology, an independent software testing company and a member of Software Testing Company (STC) Group, today announced the launch of its TestLab in Hyderabad.

Shri.R.Damodar Reddy, Hon'ble State Minister of Communications & Information Technology, today inaugurated the state of the art facility in Hyderabad.

Speaking on the Occasion, Mr. Thirumal Raj, CEO, STCThirdEye said, ' with the global testing market growing at a scorching pace and poised to touch the 13 billion USD mark, we are looking at leveraging the latent demand in expanding our market presence and would focus more on verticals like BFSI, Healthcare, Telecom and Embedded System.'

'We have implemented the Information Security Management System, which makes the OTC (Offshore Test Center) more secured. This dedicated service helps the product development companies to focus on product enhancements and release their products at the right time', added Mr. Raj.

The STC Group specializes in software testing services and has operations in 15 locations across India. STC ThirdEye Technology has offshore TestLabs in Chennai, [Bangalore](#) and [Mumbai](#) with strength of more than 500 employees. The [Hyderabad](#) facility can accommodate over 300 testing resources making it the largest of all.

STCThirdEye provides various services like Functional, Performance, Usability, Compatibility, Security, White box and User Acceptance Testing to the clients based on their requirements. Providing comprehensive services in software testing right from training to third party testing and being a focused player in the software market from inception, STCThirdEye makes a difference in the testing arena.
